New York Labor Health Care Alliance Partners with ID Resolution to Endorse Identity Theft Services to Members

Basking Ridge, NJ – Recognizing that union members are increasingly the target of identity theft, The New York Labor Health Care Alliance has partnered with ID Resolution to offer peace of mind to its members as part of an effort to protect them from the ever increasing risk of identity theft. As a result of the partnership, NYLHCA is endorsing ID Resolution's proprietary WRAP™ service giving every victim or suspected victim of identity theft unlimited access to a personal Fraud Specialist. These highly trained specialists will facilitate the resolution of virtually any identity related problem from start to finish.

"At NYLHCA we take a holistic approach to the lives of our members. Along with supporting their educational, social and general well-being, we feel the addition of Identity Theft services and our partnership with ID Resolution will offer another layer of support in their lives," said Robert Valenty, President of the Alliance. "We are proud that our Alliance is at the forefront of providing new and meaningful services and programs in a rapidly changing world. Clearly identity theft is very real, it's not going away and we felt a need to offer a cost effective option for our Members."

A recent study showed that over \$16.4 billion was stolen from over 16 million US consumers via identity fraud in 2017. It has also been a top complaint to the Federal Trade Commission for the last five years and as the FTC Chairwoman recently admitted, "As most Americans know, we live in an age where it's a matter of when, not if, you will become a victim of identity theft."

Nick Williams, ID Resolution's CEO added that "Identity Theft knows no social, economic or age boundaries, and labor organizations are showing increased interest in having services to assist and provide support to their members who become victims of identity theft". "We think the NYLHCA is showing great leadership as they address the issue head on and endorse ID Resolution's services to assist members trying to deal with what can be a very complex problem."

ID Resolution's WRAP service provides every victim or suspected victim of identity theft unlimited access to a personal Fraud Specialist who will facilitate the resolution of virtually any

identity related problem from start to finish. The Fraud Specialist works with all creditors, agencies, law enforcement, professional associations, credit reporting agencies and collection companies. The Fraud Specialist also works with the victim when necessary, to place fraud alerts, credit freezes and suppressions with the three credit bureaus. ID Resolution's WRAP service also provides extensive credit and personal data monitoring products when deemed appropriate at no additional charge to the victim.

For more information on WRAP and our other services, please call Nick Williams or Mark Perkins at 877-308-9167 or visit us at www.idresolution.net

We opened our files and took a look at our Top 5 case types of Identity Theft over the past year.....

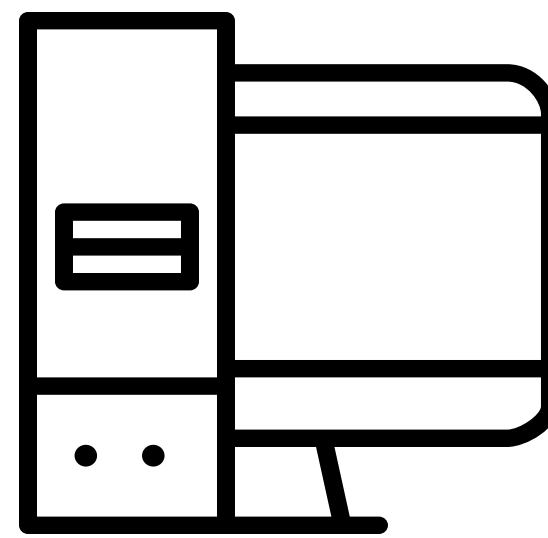

1. Credit Card Account Takeover

Wider use of "pin & chip" has meant less fraud at point of sale and a reversion to takeover of existing accounts.

2. Data Breach Victim

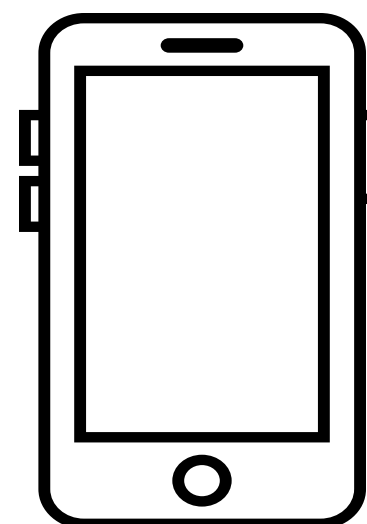

The Equifax data breach, among others, created ongoing issues as personal information was obtained and fraudulently used.

3. Medical Record/Insurance Fraud

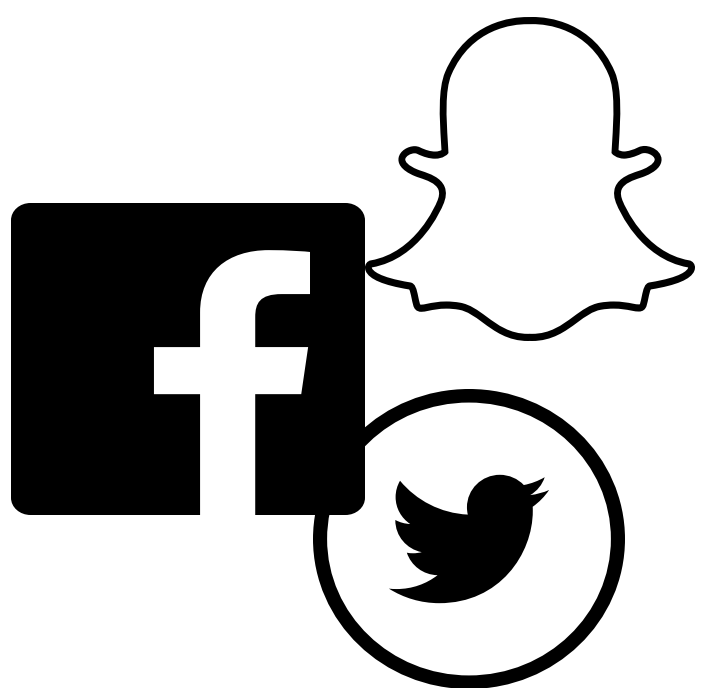

The amount of personal information in a medical/insurance record and the frequent attacks on medical institutions ensures they are a constant target for identity thieves.

4. Mobile Phone New Account Fraud

Stolen SSN's and other PII are being used to purchase new cell phones and open mobile accounts. With top cell phones costing up to \$800 there's been a big uptick in this type of fraud.

5. Social Media - Fraudulently Obtained Personal Information

Those "fake friends" are eager to obtain our personal information !
Wider use of social media creates bigger opportunities for fraud whether we use these platforms for personal or business use.

So How Can We Reduce The Chance of Being a Victim ?

Stay vigilant and alert to the safeguarding of your personal information both physically in it's paper format and digitally with your online activities.

Act early! If you think you may have an Identity Theft problem, call us!

It's Vacation Time !!!!

Let's enjoy it
and
remember to
keep our
Identity safe!

Stop your mail or have it collected. Mail box phishing is rife at this time

Keep your valuable documents at home in a secure place unless you absolutely need them with you

Don't take all of your credit cards. Just a couple should suffice. alert your card companies so that they know you are travelling

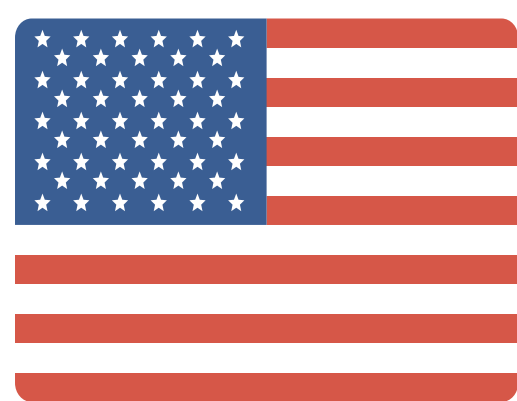

If you do need to travel with documents, make copies and secure them at home

If you are using a hotel computer, make sure to close out the browsing session when you finish especially if you have been accessing sensitive information

Make sure you are accessing the internet on a secure network. Be wary of free wifi. Look for the padlock symbol

If traveling overseas, make sure you know where the nearest US consulate is in case you need help

Don't leave computers or mobile devices in your hotel room. If you have to, make sure you have your data backed up elsewhere

We deserve a fun vacation! Protecting our identity is about common sense and good habits.

Let's enjoy our vacation, not have cause to regret it! And don't forget, we're here if you need us! Have fun!
