

# Understanding Fertility Benefits

Join NYLHCA for a webinar and Q+A about fertility benefits for your fund and members

[Click here to join the meeting](#) **April 12, 2023 | 9:30 am ET**

The NYLHCA has partnered with Progyny to offer this webinar on fertility benefits .

Infertility impacts 1 in 5 couples, more than diabetes, asthma, depression and cancer. 1 in 3 cases of infertility are male-factor. Many Plans are already paying for coverage through their health plan, but without a managed benefit, they are unable to control costs or provide members with the enhanced support that is essential for a complex medical condition like infertility.

In this session we will:

- Explore what exactly a managed fertility and family building benefit is, and what it looks like.
- Examine where members are seeking care currently and highlight how their experience can be filled with roadblocks to care and financial hardships
- Differentiate between male and female treatment journeys
- Demonstrate how plans can better support members struggling with infertility

If selected, Plans will learn how adding fertility and family building benefits can optimize healthcare value for both the Plan and its members.
